**Being the largest CBD brand in Las Vegas
is a title we hold with pride.**

Producing only top-quality end products for our clients is done through heavily monitored growth, extensive lab testing and quality control.

All our products are **made in U.S.A.** and are derived from **100% natural ingredients** and industrial hemp.

For us, being up to par on the American standard for CBD isn't enough. We set the bar high, and reach it **Every. Single Time.**

That's the reason our clients come back for more of their favorite products that made a difference in their life.

Green Planet offers natural wellness solutions with **pure hemp oil** and other natural compounds to ensure customer satisfaction and long lasting results.

DELIVERING PREMIUM HEMP DERIVED CBD PRODUCTS

TINCTURES

Daily use of a premium CBD tincture is bound to work wonders.

Offering a variety of broad and full spectrum tinctures, Green Planet is able to help you achieve health and wellness in the most natural way there is.

We have developed formulas that are beneficial for chronic pain, joint and muscle pain, arthritis, sleeping problems, digestive problems, anxiety, depression and many more discomforts you may be experiencing.

Green Planet strives to produce only high-quality CBD products derived from top tier hemp for you to enjoy.

Know your needs:

Hemp derived products are split into two main categories:

- Broad Spectrum
- Full Spectrum

The main difference between the two is that **Broad Spectrum** consists of most of the essential cannabinoids of the hemp plant, excluding THC (psycho-active material found in marijuana).

Full Spectrum however, does consist of minor amounts of THC, not an amount enough to give you that fuzzy feeling but just enough to give you the many benefits that it has to offer along with the health benefits found in CBD.

It is important to know the differences when choosing your tincture or CBD product in order to know what to expect while using it.

Green Planet offers a variety of flavors and potencies from both categories for you to choose from.

LAB TESTED QUALITY PRODUCTS

TINCTURES

Broad Spectrum:

Green Planet uses high-grade hemp extract separated entirely from the THC compound in the hemp plant, resulting in a pure CBD oil.

Our premium broad spectrum tinctures are available in various concentrations, the higher the potency - the less you need to take each time, therefore the product will also last longer.

Taking your daily dose of CBD should be enjoyable and something to look forward to, especially thanks to our delicious flavors which can be easily mixed in with your morning coffee, juice or a smoothie.
